### PROFILE

Seasoned professional specializing in Dot Net and MVC projects, with expertise in crafting robust Web API solutions for seamless integration within dynamic web applications. Proficient in Umbraco and Microsoft Dynamics, adept at navigating content management intricacies and enhancing business processes. Additionally, possess hands-on experience in React.js, enabling the creation of visually appealing interfaces and enhancing user experiences. If you're seeking expertise in Dot Net, MVC, and React.js, I deliver impactful solutions tailored to your needs.

### WORK EXPERIENCE

#### Software Developer

iConnect Info Solutions Pvt. Ltd. 2023-Present

- Experienced in Dot Net MVC framework, with a focus on creating scalable and maintainable web applications.
- Proficient in Umbraco CMS, with extensive experience working on multiple projects involving payment integration, mail integration, and Umbraco Commerce.
- Skilled in version migration, having worked with Umbraco versions 8, 10, 12, and 13.
- Developed and maintained NuGet libraries to streamline development processes and promote code reuse.
- Proficient in front-end development, with expertise in HTML, CSS, and JavaScript.
- Successfully deployed projects on ISS and Azure platforms, ensuring smooth and reliable performance in production environments.
- Adept at creating headless APIs for Umbraco, enabling seamless integration with external systems and applications.
- Created Web APIs using .NET, facilitating efficient communication between client and server-side applications.

#### Trainee Developer

EtevaTech Consulting 2022-2023

- Designed and implemented RESTful APIs using Dot Net Web API for seamless communication between client and server applications.
- Utilized SQL Server database for backend data storage and management in various projects, ensuring data integrity and scalability.
- Implemented email functionality utilizing JWT tokens and .NET Identity for secure authentication and authorization.
- Developed a space management project using Dot Net Web API and SQL Server, implementing the CQRS pattern for efficient data handling and scalability. Deployed on ISS and Azure platforms
- Acquired certification in Microsoft Dynamics, demonstrating proficiency in the Dynamics suite of business applications
- Integrated Power Apps with Business Central ERP system to streamline processes and boost productivity.
